CARE and
Living in COMMUNITY

Initiated in November 2018 with the granting of funding from the European fund Urban Innovative Actions (ERDF), the implementation phase of the CALICO project will end on October 31, 2021. It is by virtue of this administrative closure of the European project, which coincides with the end of the inhabitants' moving in and the beginning of their new adventure, that we are organizing this conference looking back on the three years of the project.

CALICO, 'Care and Living in Community', is a project of 34 apartments in cohabitation offering a generational and social mix in interaction with the neighborhood. Its priorities are gender, welcoming birth and end-of-life at the heart of living together, care, and access to housing within the framework of a «Community Land Trust».
